A. J. BLEECKER & Co., No. 7 Broadest.

FARM LANDS for SALE.—The ILLINOIS CENTRAL RAILROAD COMPANY is now prepared to

CENTRAL RAILROAD COMPANY is now prepared to sell over

TWO MILLION OF ACRES

OF

FARMING LANDS.

IN TRACTS OF FORTY ACRES AND UTWARD

LONG CREDITS

And at

LOW RATES OF INTEREST.

These Lands were granted by the Government to aid in the construction of this Railroad, and include some of the richest and most fertile Prairies in the State, interspersed here and there with magnificent groves of oak and other timber. The Road extends from Chicago on the north-east to Cairo at the south, and from thence to Galena and Dunleith, in the north-west extreme of the State, and as all the lands he within fifeen miles on each eide of this Road, ready and cheap means are afforded by it for transporting the products of the lands to markets. Moreover, the rapid growth of flourishing towns and villages along the line, and the great increase in population by immigration, &c., afford a substantial and growing home demand for farm produce.

The soil is a dark, rich moid, from one to five feet in depth, is

kets. Moreover, the rapid growth of flourishing towns and villages along the line, and the great increase in population by funding as along the line, and the great increase in population by funding and population by funding and population by funding from the cultivation of Wheat, fundan Corn, see easily related to be cut down, stumps grubbed, or stone picked of, as is generally the case in cultivating and great productiveness are the well-known characteristics of Illinois lands. These are not required to be cut down, stumps grubbed, or stone picked of, as is generally the case in cultivating new land in the older States. The first crup of Indian Corn, planted on the newly-broken and, and all repays the cost of plowing and femcing.

Wheat sown on the newly-turned sod is sure to yield very large profits. A man with a plow and two yoke of oven will brok one and a half to two acres per day. Contracts can be made for breaking, ready for Corn or Wheat, at from \$25 or 25 ber acre. By indicious management the land may be plowed and fenced the first, and under a high state of cultivation the second year.

Corn, Grain, Cattle, &c., will be forwarded at reasonable rates to Chicago for the Eastern market and to Cairo for the Southern. The largery yield on the cheap lands of Illinois over the high-priced land in the Eastern and Middle States is known to be much more than sufficient to pay the difference of transportation to the Eastern market.

Bituminous Coal is mined at several points along the Road at \$1.50 to \$4 per tun. Wood can be had at the same rates per cord.

These who think of settling in lowe or Minnesota, should bear in mind that lands there of any vatue, along the water-courses and for many miles inland, have been disposed of; that for those for heady many and their there are no convenience for transporting the produce of means one or two hundred miles by argoun to market, milroads not having been introduced three produces of means and several points along the scale produce of these lands one or two hundred mi

facilities furnished by on which are not interespectively for \$50 to \$25, according to location, quality, &c. Contracts for Deeds may be made during the year 1836, stipulating the purchase money to be paid in five annual installments—the first to become due in two years from the date of contract, and the others annually thereafter. The last payment will become due at the end of the sirth year from the date of the contract.

INTEREST WILL BE CHARGED AT ONLY THREE PER CENT PER ANNUM.

WE CHARGED AT ONLY THREE PER CENT PER ANNUM.

WE CHARGED AT ONLY THREE PER CENT PER ANNUM.

WE GIBSON, No. 38 Union-square, reopened—will open on MONDAY, Sept. 22. Circulars at Appleton's.

of contract, and the others annually thereafter. The last payment will become due at the end of the sixth year from the date of the contract.

INTERSY WILL BE CHARGET AT ONLY THREE PER CENT PER ANNUM.

As a security to the performance of the contract, the first two years inderes; must be paid in advance, and it must be understood that at least one-tenth of the land purchased shall yearly be brought under cultivation. Longer credit, at 6 per cent per annum, may be negotiated by special application. Twenty per cent from the credit price will be deducted for cash. The Company's construction bonds will be received as cash.

Reedy-famed Farm Buildings, which can be set up in a few days, can be obtained from responsible persons.

They will be 12 feet by 26 feet, divided into one living and three bedrooms, and will cost complete, set up on ground chosen any where along the road, \$150 in cash, exclusive of transportation. Larger buildings may be contracted for at proportionate rates. The Company will forward all the materials for such buildings over their road promptly.

Special atrangements with dealers can be made to supply those purchasing the Company's lands with tending materials, agricultural tools, and outful of provisions in any quantity at the lowest wholesale prices.

It is believed that the price, long credit, and low rate of interest charged for these lands, will enable a man with a few hundred dollars in cash and erdinary industry to make himself independent before all the purchase money becomes due. In the unant time, the ropid settlement of the country will probably have increased their value four or five fold. When required, an experienced person will accompany applicants to give information, and aid in selecting lands.

Circulars containing numerous instances of successful farming, signed by respectable and well-known farmers living in the neighborhood of the Railroad lands throughout the State—also neighborhood of the Railroad lands throughout the State—also neighborhood of the Railroad lands througho
